

資料庫管理(二) week6

B10523030 簡聿均 (因無法到校上課，以作業方式計分)

MySQL 資料庫抓取練習

The screenshot displays the phpMyAdmin web interface in a browser. The address bar shows the URL: `localhost/phpmyadmin/tbl_sql.php?db=資料庫管理&table=emp`. The left sidebar shows the database structure, with the '資料庫管理' database selected and the 'emp' table expanded. The table's columns are listed: `empno (int)`, `ename (int)`, `hiredate (int)`, and `sal (int)`. The main panel shows the SQL query editor with the following query:

```
1 SELECT empno, ename, sal*12, hiredate
2 FROM emp
3 WHERE deptno = 30;
```

Below the query editor, there are buttons for `SELECT *`, `SELECT`, `INSERT`, and `UPDATE`. A checkbox for `繫結參數` is also visible. At the bottom, there is a text input field labeled `將此 SQL 查詢加為書籤`.
